On
Subject :- Web Technology

Lab Report # 3
Title:- Hyperlink, srcset, imagemap

Submitted By:-

Name: Ujjwal Jaiswal
Roll No: 241527
Faculty: Science and Technology
Semester: 4th (DAY)

Submitted to:-

Instructor: Er. Simanta Kasaju
Department of IT
Submissions date: 2026-06-01

S.N.	LAB TOPICS	DATE	SUBMITTED DATE	REMARKS
1	INTRODUCTION TO HTML	2026/04/30	2026/05/20	
2	LIST TAGS	2026/05/19	2026/05/24	
3	Hyperlink, srcset, imgemap	2026/05/26	2026/06/01	
4				

Theory

1. Hyperlink in HTML

The `<a>` (Anchor) tag is used to create hyperlinks that connect one webpage, document, file, or resource to another. It allows users to navigate between web pages by clicking on text or images.

Common Attributes:

- **href** – Specifies the destination URL.
- **target** – Defines where the linked document will open.
- **title** – Provides additional information about the link.
- **download** – Downloads the linked file instead of opening it.

Advantages of Hyperlink:

- Enables easy navigation between web pages.
- Connects related information and resources.
- Improves website usability and accessibility.
- Allows linking to external websites, files, and email addresses.

2. Srcset Attribute in HTML

The `srcset` attribute is used with the `<img>` tag to provide multiple image sources of different sizes or resolutions. The browser automatically selects the most suitable image based on the user's device and screen size.

Common Attributes:

- **src** – Specifies the default image.
- **srcset** – Provides a list of image sources.
- **sizes** – Defines image display sizes for different screen widths.
- **alt** – Provides alternative text for the image.

Advantages of Srcset:

- Supports responsive web design.
- Improves image quality on different devices.
- Reduces page loading time.
- Saves bandwidth by loading optimized images.

3. Image Map in HTML

An image map allows different areas of a single image to act as separate clickable links. It is created using the `<map>` and `<area>` tags.

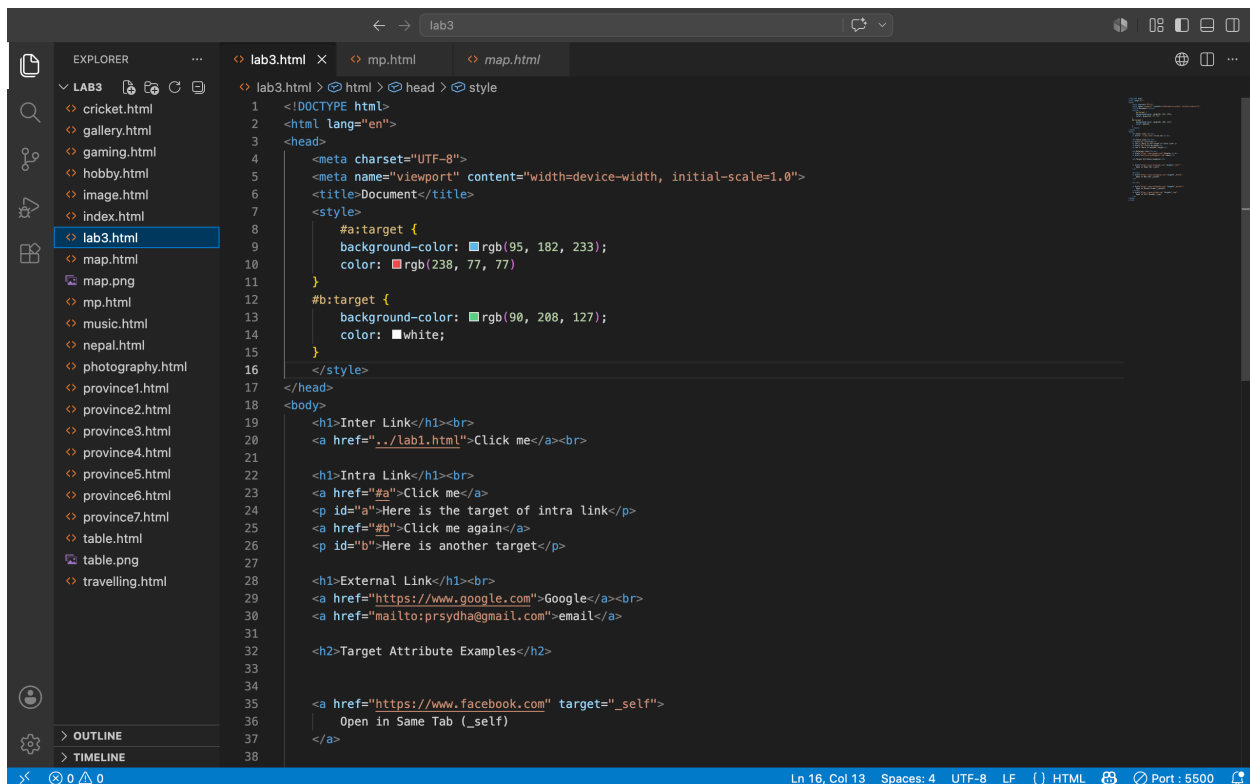

Common Attributes:

- **usemap** – Associates an image with a map.
- **name** – Defines the map name.
- **shape** – Specifies the shape of the clickable area.
- **coords** – Defines the coordinates of the clickable area.
- **href** – Specifies the destination link.

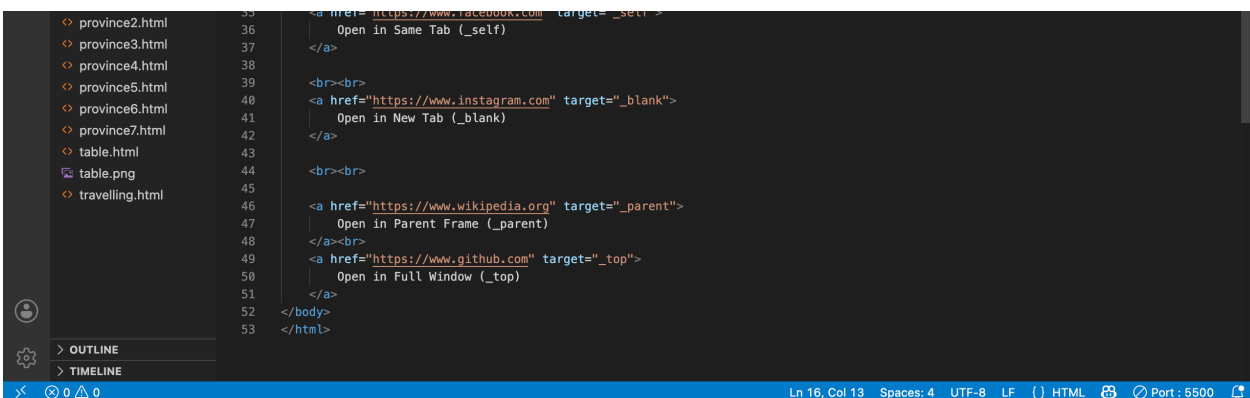

Advantages of Image Map:

- Makes images interactive.
- Allows multiple links within a single image.
- Improves visual navigation.
- Saves webpage space by combining several links into one image.
- Enhances user engagement and experience.

- 1) Use different hyperlinks (Inter,intra, email & external) according to your details.
- 2) Also, use all kinds of Hyperlink references
- 3) Use all target attributes and show examples by yourself.

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">

47   </a><br>
48   <a href="https://www.github.com" target="_top">
49     | Open in Full Window (_top)
50   </a>
51
52 </body>
53 </html>
```

OUTPUT:

Inter Link

[Click me](#)

Intra Link

[Click me](#)

Here is the target of intra link

[Click me again](#)

Here is another target

External Link

[Google](#)
[email](#)

Target Attribute Examples

[Open in Same Tab \(_self \)](#)

[Open in New Tab \(_blank \)](#)

[Open in Parent Frame \(_parent \)](#)

[Open in Full Window \(_top \)](#)

4) Create 2 different pages with names index.html and gallery.html. In index.html create a link to the gallery and we again go back to the index.html

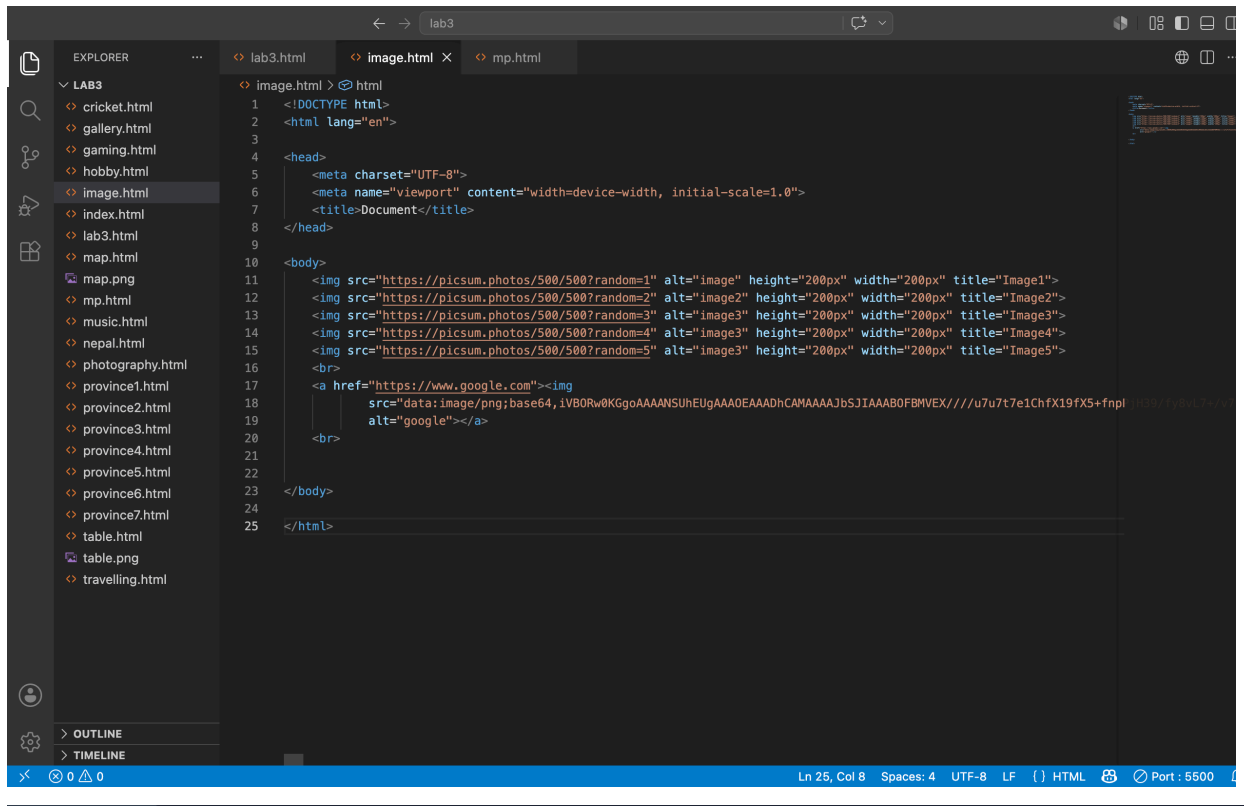

```
<> gallery.html > html
1  <!DOCTYPE html>
2  <html lang="en">
3  <head>
4      <meta charset="UTF-8">
5      <meta name="viewport" content="width=device-width, initial-scale=1.0">
6      <title>Document</title>
7  </head>
8  <body>
9      <a href="index.html">Home</a><br>
10 </body>
11 </html>
```

```
1  <!DOCTYPE html>
2  <html lang="en">
3  <head>
4      <meta charset="UTF-8">
5      <meta name="viewport" content="width=device-width, initial-scale=1.0">
6      <title>Document</title>
7  </head>
8  <body>
9      <a href="gallery.html">Gallery</a>
10 </body>
11 </html>
```

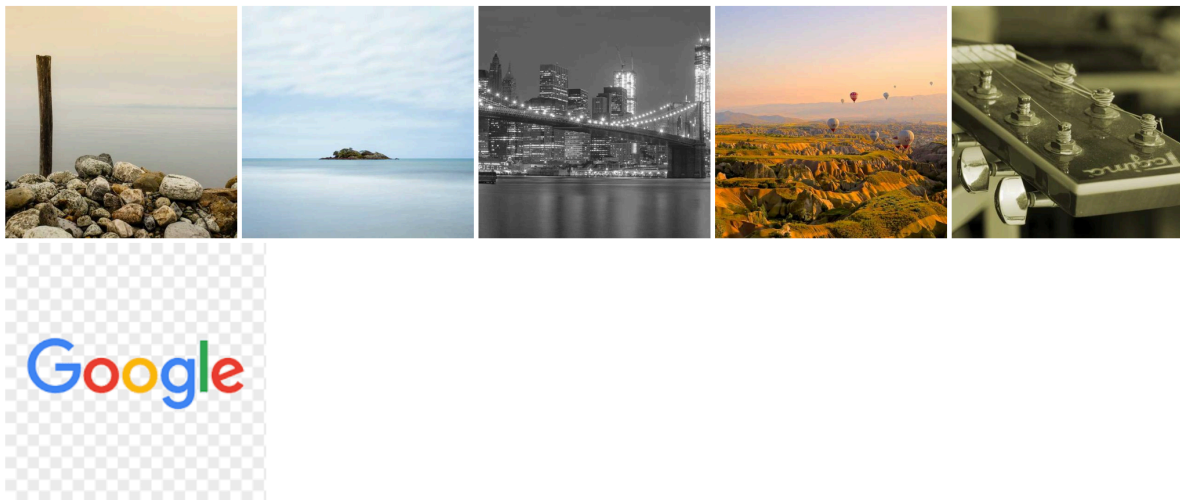

5) Create image.html, put 5 pics and use all image attributes (height, width, alt, title, src)

6) Make some images as hyperlinks

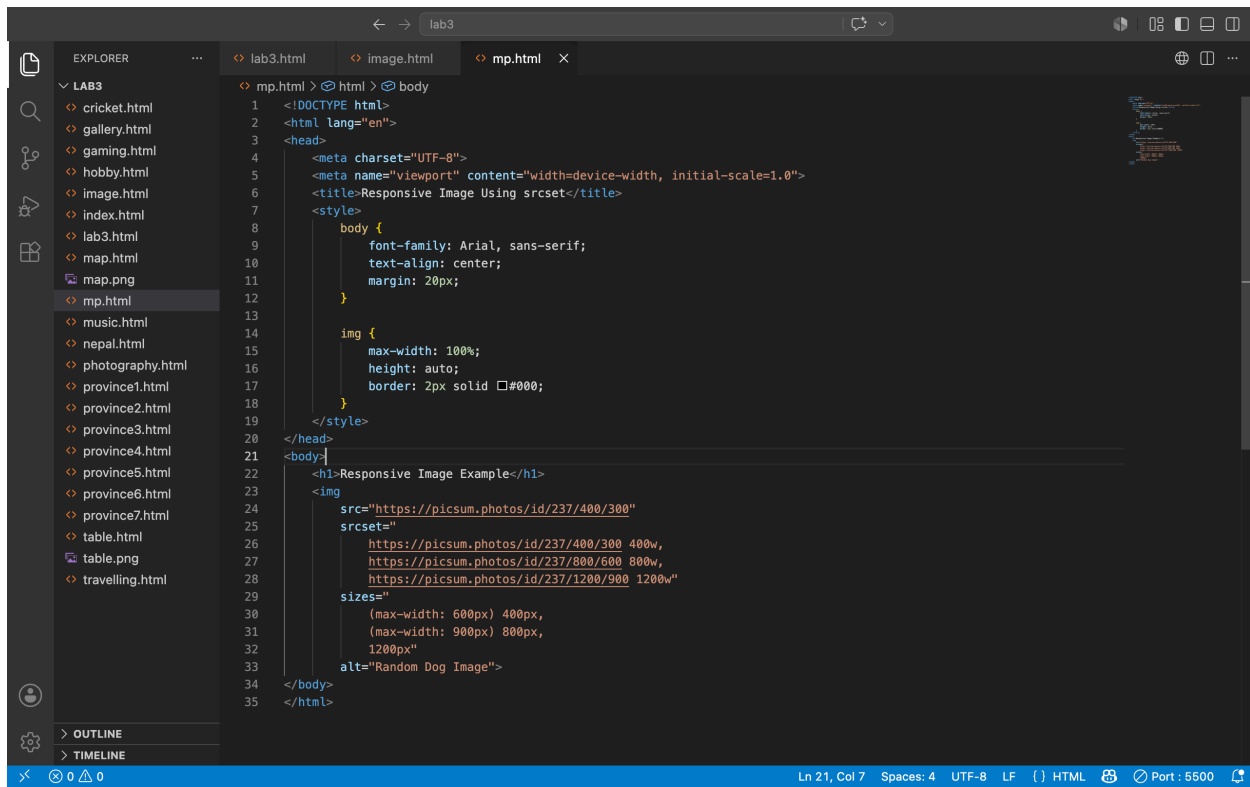

7) Show img tag examples with all attributes

```
1 <!DOCTYPE html>
2 <html lang="en">
3
4 <head>
5   <meta charset="UTF-8">
6   <meta name="viewport" content="width=device-width, initial-scale=1.0">
7   <title>Document</title>
8 </head>
9
10 <body>
11   
12   
13   
14   
15   
16   <br>
17   <a href="https://www.google.com"></a>
20   <br>
21 </body>
22
23 </html>
```

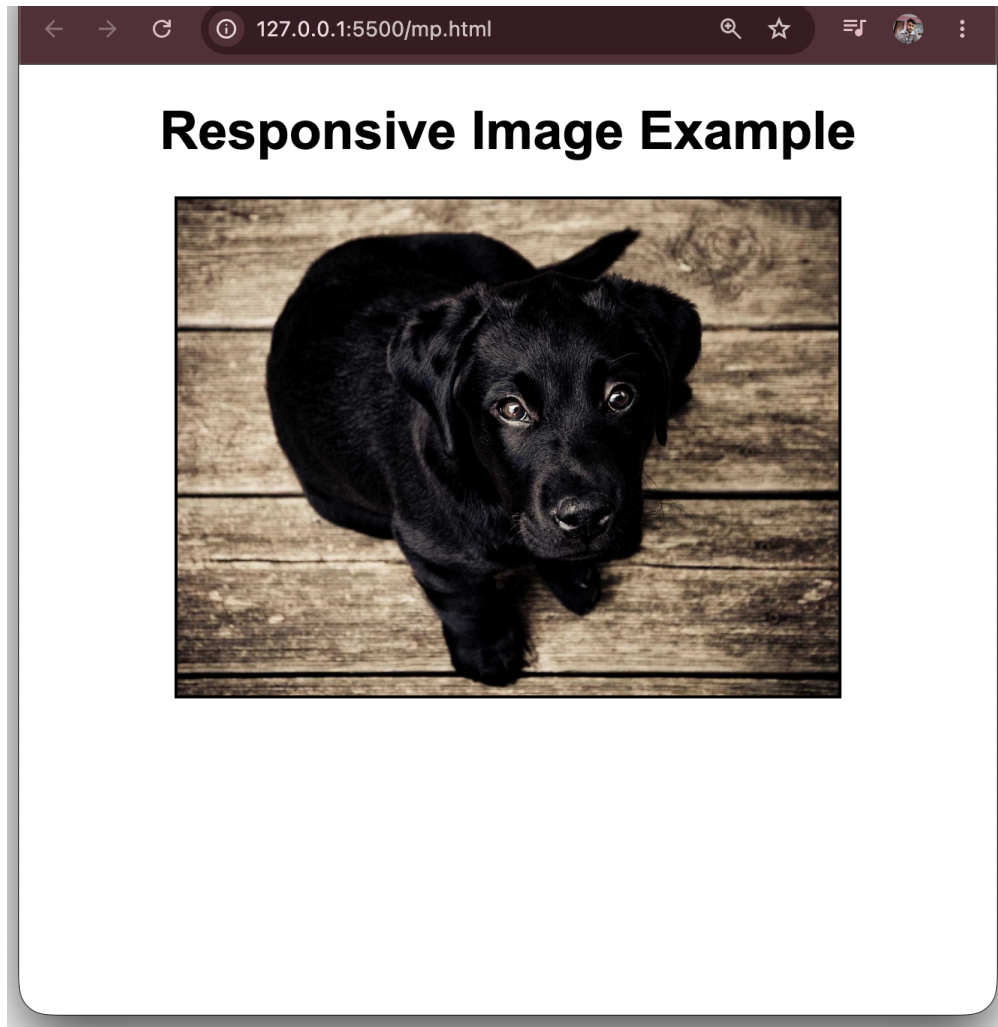

8) Use img src set and show some examples.

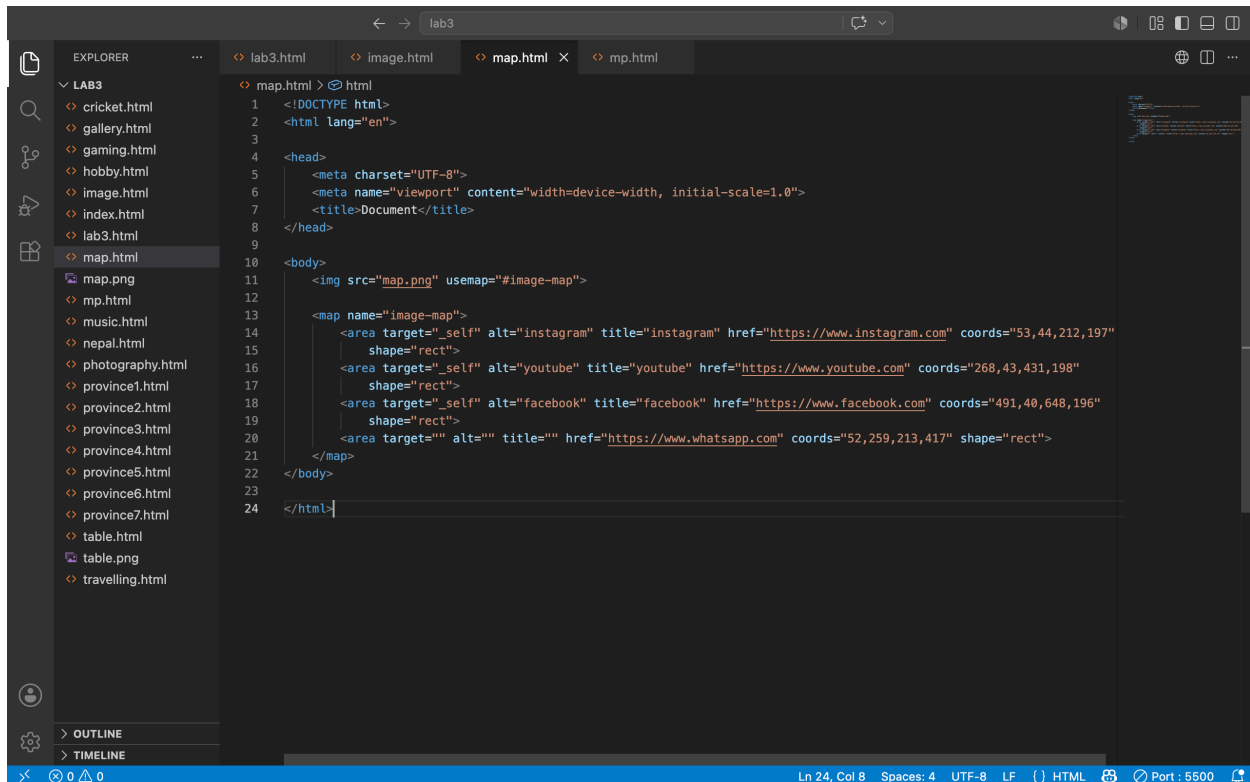

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>Responsive Image Using srcset</title>
7   <style>
8     body {
9       font-family: Arial, sans-serif;
10      text-align: center;
11      margin: 20px;
12    }
13
14    img {
15      max-width: 100%;
16      height: auto;
17      border: 2px solid black;
18    }
19  </style>
20 </head>
21 <body>
22   <h1>Responsive Image Example</h1>
23   
34 </body>
35 </html>
```

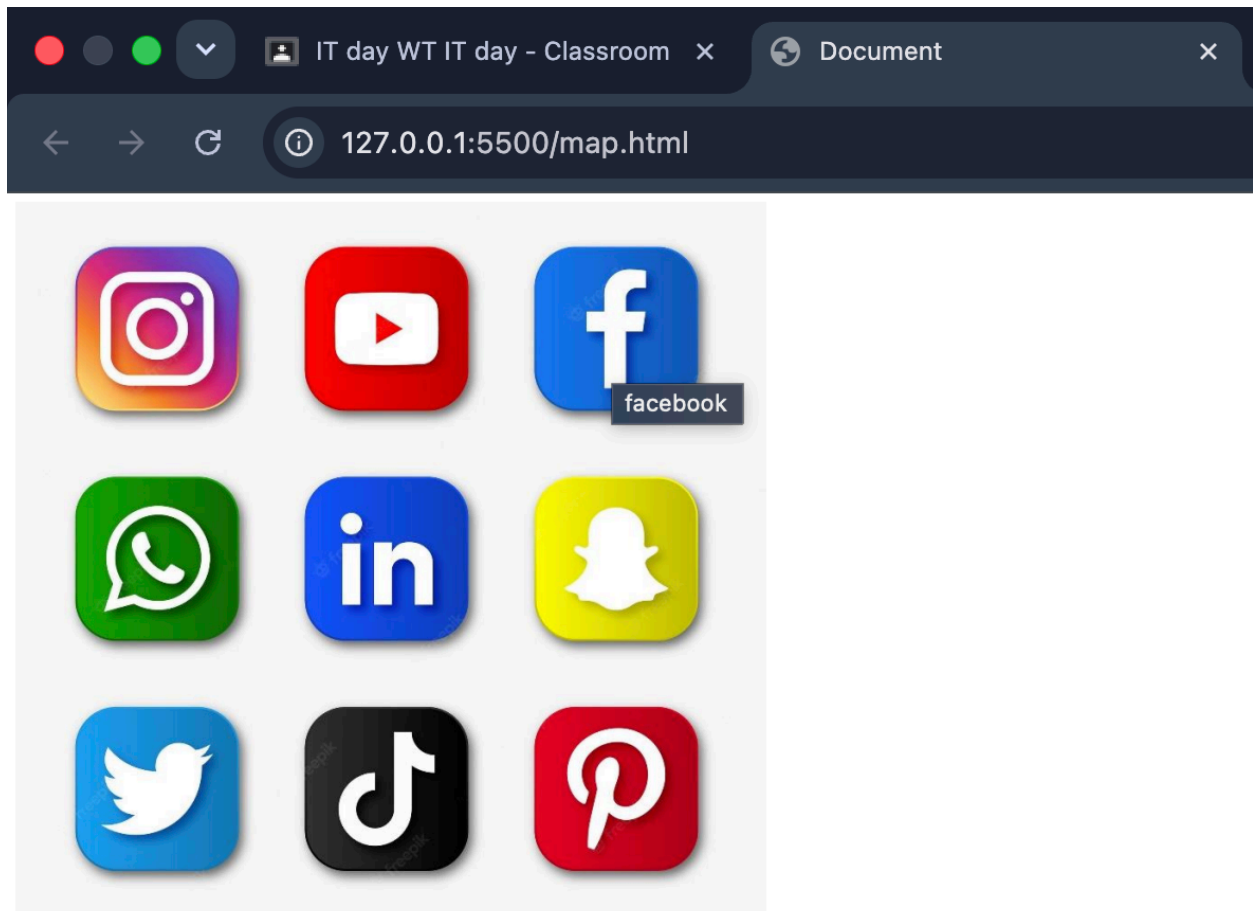

OUTPUT:

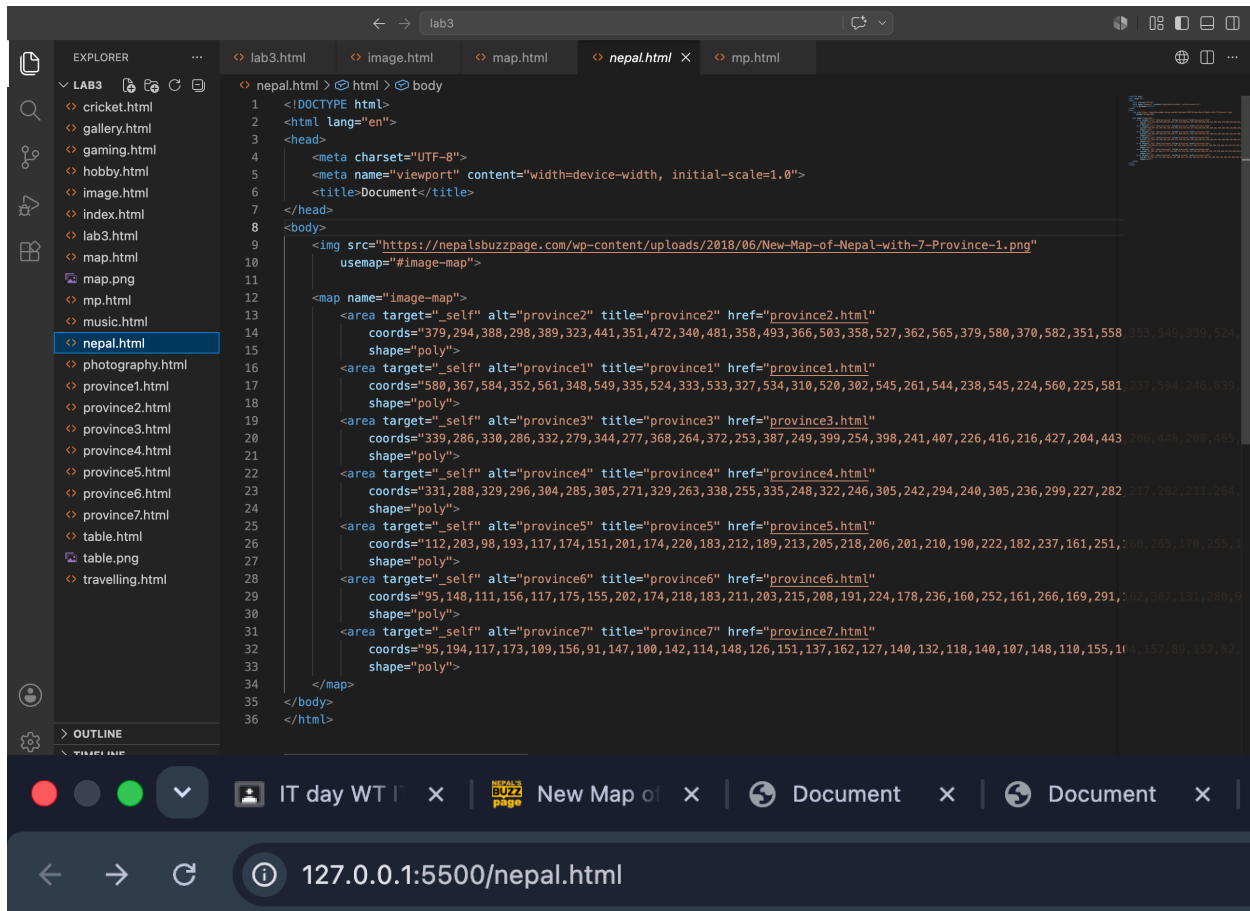

9) Design index.html using div. which contains Home, Facebook, Insta. Link them with hyperlink. In Facebook add at-least 5 pic and same for insta as well. provide them some heading, When I click Facebook 5 pic must render also pic elements like alt,title.if I click on image it will open in big screen.do same for insta.html.You can also add background as well.

```
1 <!DOCTYPE html>
2 <html lang="en">
3
4 <head>
5   <meta charset="UTF-8">
6   <meta name="viewport" content="width=device-width, initial-scale=1.0">
7   <title>Document</title>
8 </head>
9
10 <body>
11   
12
13   <map name="image-map">
14     <area target="_self" alt="instagram" title="instagram" href="https://www.instagram.com" coords="53,44,212,197"
15       shape="rect">
16     <area target="_self" alt="youtube" title="youtube" href="https://www.youtube.com" coords="268,43,431,198"
17       shape="rect">
18     <area target="_self" alt="facebook" title="facebook" href="https://www.facebook.com" coords="491,40,648,196"
19       shape="rect">
20     <area target="" alt="" title="" href="https://www.whatsapp.com" coords="52,259,213,417" shape="rect">
21   </map>
22 </body>
23
24 </html>
```

10. Write a html code for above such that every province no. behaves as hotspot (i.e if I click at the region of province 1 then I will link to province1.html which contains info about province 1.)

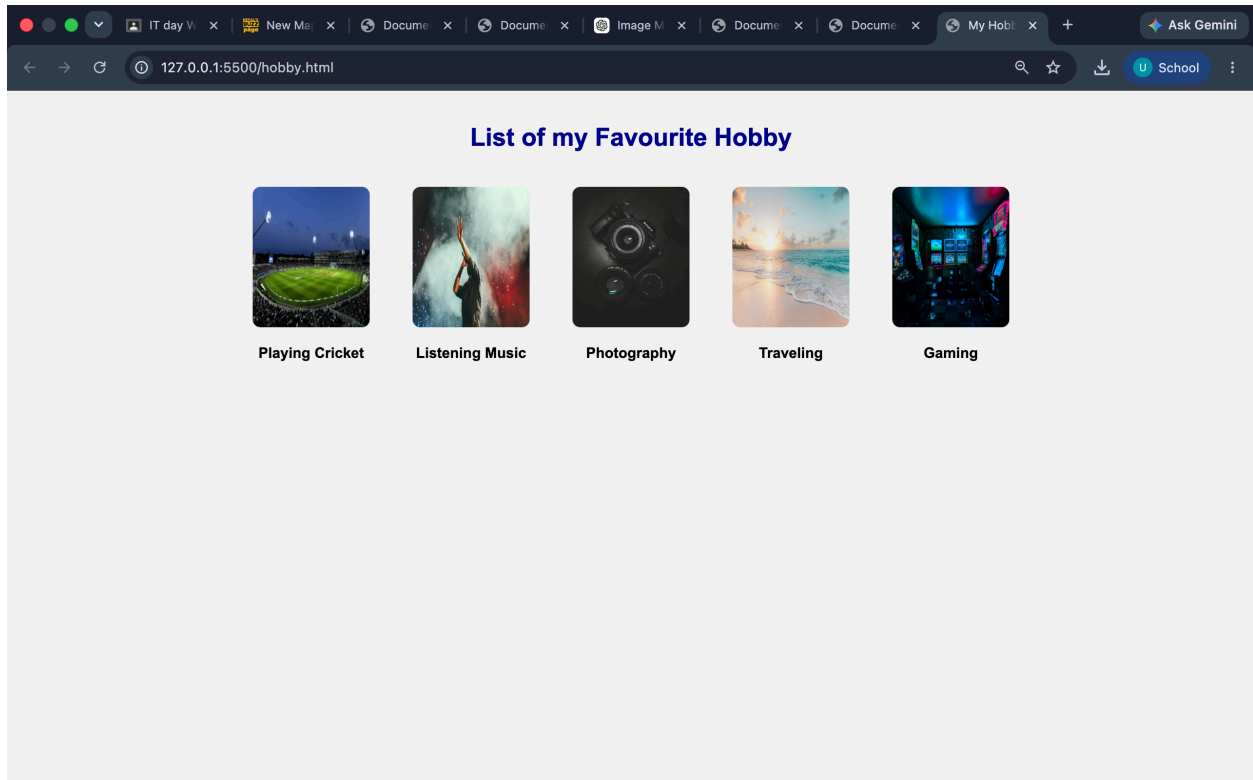

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4 <meta charset="UTF-8">
5 <meta name="viewport" content="width=device-width, initial-scale=1.0">
6 <title>Document</title>
7 </head>
8 <body>
9 
11
12 <map name="image-map">
13 <area target="_self" alt="province2" title="province2" href="province2.html"
14 coords="379,294,388,298,389,323,441,351,472,340,481,358,493,366,503,358,527,362,565,379,580,370,582,351,558,359,549,339,324,
15 shape="poly">
16 <area target="_self" alt="province1" title="province1" href="province1.html"
17 coords="580,367,584,352,561,348,549,335,524,333,533,327,534,310,520,302,545,261,544,238,545,224,560,225,581,317,389,246,639,

34 </map>
35 </body>
36 </html>
```

11. Create hobby.html. which have heading As my hobby. Use at-least 5 hobbies with image. for example, my hobby is playing cricket then I must include cricket related image and if I click it, it will navigate me to another window showing some description about cricket, your fav cricketer etc. similarly for other hobbies as well.

```
lab3
hobby.html x 1.html mp.html
1 <!DOCTYPE html>
2 <html lang="en">
3
4 <head>
5 <meta charset="UTF-8">
6 <meta name="viewport" content="width=device-width, initial-scale=1.0">
7 <title>My Hobby</title>
8
9 <style>
10     body {
11         font-family: Arial, sans-serif;
12         background-color: #f4f4f4;
13         text-align: center;
14         margin: 0;
15         padding: 20px;
16     }
17
18     h1 {
19         color: darkblue;
20         margin-bottom: 30px;
21     }
22
23     .container {
24         display: flex;
25         flex-wrap: wrap;
26         justify-content: center;
27         gap: 25px;
28     }
29
30     .hobby {
31         padding: 15px;
32         border-radius: 10px;
33         width: 150px;
34     }
35
36     img {
37         width: 100%;
38         height: 180px;
39         border-radius: 10px;
40         cursor: pointer;
41         transition: 0.3s;
42     }
43 </style>
44 </head>
45 <body>
46
47 <h1>List of my Favourite Hobby</h1>
48 <div class="container">
49 <div class="hobby">

Laptop
This is a laptop used for programming and study.

Mobile
This is a smartphone used for communication.

Headphone
127.0.0.1:5500/table.html#laptop

Laptop
This is a laptop used for programming and study.

Mobile
This is a smartphone used for communication.

Headphone
Headphones are used for listening to audio.

Mouse
A mouse is a pointing device.

Camera
A camera is used to capture photos and videos.

Cup
A coffee cup placed on the table.

Vase
A decorative flower vase.
